A.Y 2015-16

MECHANICAL ENGINEERING DEPARTMENT

- The use of Computer Aided tools in structural analysis and design has been proven to be effective from the results output.
- It was observed that the time for performing the design work is significantly reduced. Thus, this explains the importance of comparison between different software packages and more importantly performing hand calculations for like a floor and comparing for the same floor in the software packages.
- Therefore, it can be concluded that the structure has fulfilled the Ultimate Limit State and the Serviceability Limit State requirements
