Sheriguda (V), Ibrahimpatnam (M), Hyderabad,
R.R.Dist., Telangana – 501 510

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

The Department offers the Mechanical Engineering program for B.Tech Students and it was initiated in the year 2009 with an intake of 60 students subsequently in the year 2013 the intake has been increased from 60 to 120 students.

Mechanical Engineering is very important and the key in various applications in Designing, Physical Science, Building Arithmetic and Materials Science principles to Configuration, Investigate, Make and Keep up Mechanical Frameworks. It is one of the most established and broadest of the Designing Tools and orders.

The Mechanical Engineering field requires a comprehension of center zones including Mechanics, Elements, Thermodynamics, Materials Science, Auxiliary Analysis and Power. Not with standing these center standards, Mechanical Specialists use Devices, for example PC supported Structure (CAD), PC helped Fabricating (CAM) and Productive component life cycle to structure and break down Assembling Plants, Modern Hardware and Apparatus, Warming & Cooling Frameworks, Transport Frameworks, Airship, Watercraft, Apply Autonomy, Medicinal Gadgets, Weapons and others. It is integrated in different parts of the building that includes the Structure, Generation and Activity of Hardware.

SCOPE OF THE PROGRAMME

The significance of refrigeration and air conditioning is increasing day by day. Hence there is need to study the thermal comfort at any range of environmental conditions. One of the major transformations of 21st century is widespread usage of modern, environmental friendly and effective air conditioning systems. Thus, it is necessary to develop modern air conditioning systems to meet the required comfort conditions. Nowa- days refrigeration has become an essential part of food chain- from post harvest heat removal to processing, distribution and storage. Modern Refrigeration is essential for many chemical and processing industries to improve the standards and quality products.

TOPICS

- Advanced Refrigeration & AC systems
- Nano Refrigeration
- Heat Load Computation
- Duct Design concepts
- 3D- Modeling of HVAC System Hands on experience on RAC Systems.

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

Workshop on Modern Refrigeration & Air-Conditioning Technologies

Modern Refrigeration and Air Conditioning is the HVACR standard for a new generation of learner. It correlates to HVAC Excellence and PAHRA accreditation requirements to ensure complete coverage that prepares students for career success. This edition has an improved instructional design, improved assessments, enhanced content on fundamentals, such as electrical theory and troubleshooting, and new digital assets that help students master knowledge, hands-on applications, and diagnostic skills. The revision also helps prepare students for employment and careers with new lab activities and features. Prepare your students for careers with new learning materials based upon the original HVACR industry standard.

- Follow-the-Heat™ Animations provide 63 short animations that introduce foundational concepts using simple, easily understood graphics and narrations.
- Troubleshooting Activities create an interactive experience designed to develop and promote troubleshooting techniques and logical diagnostic skills.
- New chapter on Electrical Troubleshooting, and expanded electrical coverage in the text and lab manual provide excellent coverage of essential information.
- Soft Skills for HVACR features emphasize the importance of workplace skills.
- Service Call Troubleshooting features present on-the-job service call situations.
- Full-color Lab Manual includes 35 new lab activities – including activities focusing on basic electrical skills and sheet metal construction.

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

The department of Computer Science and Engineering was established in the year 2007 with an intake of 60 students and increased to 180 in the year 2012. The Department has been maintaining high standards in imparting quality education in Computer Science. Computer Science & Engineering with highly experienced faculty members with highest qualification M.E / M.Tech / Ph.D Degree

The department has got highly qualified and committed faculty members supported by dedicated technical staff.

The department has established sophisticated laboratories not only to suit curriculum requirements but also to serve research needs such as Big data, Advanced Compiler Design, Data Mining, Software Engineering, Python Programming Laboratories.

To enhance the quality of learning we move forward for more collaborations and interactions with the industry that helps our students to brace themselves for working in the industry.

OBJECTIVE OF THE TRAINING

The Objective of this training is to bring the knowledge about the Android Concepts to the Faculty and Academicians to exchange information and ideas on android.

DETAILS ABOUT THE PROGRAMME

- Android is an operating system for mobile phones, tablets. Google bought Android in 2005 and has since made Android available for mobile phone, tablet and TV producers. The result is that popular brands like HTC, Samsung, etc.
- This workshop will focus on Android app development in Java. It is also possible to develop Android apps in other programming languages like C++ or Scala.

The outcome of the Training:

Upon completion of this workshop, the faculty can able to do a Research preparation and develop applications in Android

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

FDP on Android Applications

Android applications are usually developed in the Java language using the Android Software Development Kit.

Once developed, Android applications can be packaged easily and sold out either through a store such as **Google Play, SlideME, Opera Mobile Store, Mobango, F-droid** and the **Amazon Appstore**.

Android powers hundreds of millions of mobile devices in more than 190 countries around the world. It's the largest installed base of any mobile platform and growing fast. Every day more than 1 million new Android devices are activated worldwide.

This tutorial has been written with an aim to teach you how to develop and package Android application. We will start from environment setup for Android application programming and then drill down to look into various aspects of Android applications.

Android Application Development Services at Arokia

We provide a comprehensive suit and comprehensive assistance in the development of mobile application on the Android Platform to our prestigious customers. Our experts are veterans in the Java programming language and are capable to exhaust any challenge to develop feature-rich android application services. Java Programming Language is used as a basic building block and back bone for Android Application Development that allows developers to program comprehensive application on Java that runs on Android Mobile.

Android's vast range of easy to use tools and wide range of libraries, provides Mobile Application Developers with the means of an amazing mobile operating software to come up with the most efficient and rich Mobile Applications. Our development team has complete resources and technologies to make use of in developing the most acclaimed applications.

Among the various Application categories developed by us on the android platform, some of them are; Communication Application, Business Application, Multimedia Application, Internet Application, Fun/Entertainment Application, Gaming Application, Utility and Security Application. We program these Applications on the customized demands of our clients. We ensure them that these specifically designed apps on the android platform are solely designed for their specific user defined criteria.

Transportation:

Participants may avail transportation facilities of our college buses plying from different locations of the twin cities.

Venue: Auditorium, SIET

Registration for participants

Registration for participating in the Workshop may be done by sending the application from in this brochure and spot registration also accepted along with submitting this brochure. **Registration is FREE** as applicable by affiliated to all the UGC approved and state affiliated colleges.

Target Group:

Faculty from various Engineering Colleges, Research Scholars and Industrial personnel working in design & development section are invited.

Important Dates:

Last Date for submission of Registration form by post: **13th January 2018**

Last Date for submission of Registration form by E-mail: **14th January 2018**

Application is downloadable from www.siet.ac.in

**Sri Indu Institute of Engineering and
Technology**

Sheriguda (V), Ibrahimpatnam (M),
Hyderabad, R.R.Dist., Telangana – 501 510

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

The department of Computer Science and Engineering was established in the year 2007 with an intake of 60 students and increased to 180 in the year 2012. The Department has been maintaining high standards in imparting quality education in Computer Science. Computer Science & Engineering with highly experienced faculty members with highest qualification M.E / M.Tech / Ph.D Degree

The department has got highly qualified and committed faculty members supported by dedicated technical staff.

The department has established sophisticated laboratories not only to suit curriculum requirements but also to serve research needs such as Big data, Advanced Compiler Design, Data Mining, Software Engineering, Python Programming Laboratories.

To enhance the quality of learning we move forward for more collaborations and interactions with the industry that helps our students to brace themselves for working in the industry.

OBJECTIVE OF THE TRAINING

A major share of hand-held devices runs on the Android Operating System - which is open source and customizable. The Android Application Development Workshop provides participants technical training on the concepts and programming methodologies needed to develop applications for mobile devices. Participants will learn to use different android libraries. Instruction is aided with live projects which will allow students to grasp concepts of the complete mobile application development life-cycle.

Course Highlights

- Participants will be able to develop their own android applications
- Participants will understand working of various android applications.

Topics covered:

- Introduction to Mobile Application Development
- Role of Android in mobile industry
- Introduction to Android SDK and its setup
- Building the Application Framework
- Designing User Interfaces
- Activities, Services, Intents, Broadcast Receivers

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

Workshop on Android Application Development

A major share of hand-held devices runs on the Android Operating System - which is open source and customizable. The Android Application Development Workshop provides participants technical training on the concepts and programming methodologies needed to develop applications for mobile devices. Participants will learn to use different android libraries. Instruction is aided with live projects which will allow students to grasp concepts of the complete mobile application development life-cycle.

Course Highlights:

- Participants will be able to develop their own android applications
- Participants will understand working of various android applications
- Participants are encouraged to think and come up with new application ideas
- Interactive lecture sessions
- Group discussions to encourage innovation
- Good multimedia content to help students grasp the material easily
- Career guidance by experienced faculty
- Workshop developed by IIT Kanpur graduates

Course Structure & Topics covered:

- Introduction to Mobile Application Development
- Role of Android in mobile industry
- Introduction to Android SDK and its setup
- Building the Application Framework
- Designing User Interfaces
- Activities, Services, Intents, Broadcast Receivers
- Resources, Menus, Content Providers, Dialogs, Notifications
- Working with Data, Multimedia, Location
- Publishing the developed application into Play Store

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

Electronics is fundamental to many of the electrical and electronic appliances that we use today. This makes the job of an electronic engineer both exciting and challenging.

The department of Electronics and Communication Engineering was established in the year 2007 with an intake of 60 students and increased to 90 in the academic year 2008-09 and in the academic year 2010-11 the intake of students increased to 120, later the intake increased to 180 in the academic year 2012-13.

To enhance the quality of learning we move forward for more collaborations and interactions with the industry that helps our students to brace themselves for working in the industry.

ABOUT THE WORKSHOP

The Raspberry Pi is a low cost, credit-card sized computer that plugs into a computer monitor or TV, and uses a standard keyboard and mouse. It is a capable little device that enables people of all ages to explore computing, and to learn how to program in languages like Scratch and Python. This Workshop is for those who want to learn how to use Raspberry Pi. You will learn in detail about Setting up Pi, Python Language Basics, How to code for Pi, How To Connect with a Network and much more.

TOPICS TO BE COVERED

Understanding and Introduction to RPi

- *What is SOC?*
- *Versions of Raspberry Pi & Their Difference*
- *Raspberry Pi 3*
- *Basics of Electronics*
- *Hardware Description*
- *Pin Configuration*
- *Making SD Card: Formatting and Partitions*
- *Raspberry Pi SD Installer*

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

The Raspberry Pi, which is a low cost, credit-card sized computer that plugs into a computer monitor or TV, and uses a standard keyboard and mouse. It is a capable little device that enables people of all ages to explore computing, and to learn how to program in languages like Scratch and Python. It is capable of doing everything you would expect a desktop computer to do, from browsing the internet and playing high-definition video, to making spreadsheets, word-processing, and playing games. Whats more, the Raspberry Pi has the ability to interact with the outside world, and has been used in a wide array of digital maker projects, from music machines and parent detectors to weather stations and tweeting birdhouses with infra-red cameras. We want to see the Raspberry Pi being used by kids all over the world to learn to program and understand how computers work

Raspberry Pi Software support

There are several official distributions (distros) available on official downloads page. New users will find the NOOBs installer the easiest to work with, as it walks you through the download and installation of a specific distro. The recommended distro is Raspbian, which is specially designed for the Raspberry Pi and which our engineers are always optimising; but it is a straightforward process to replace the root partition on the SD card with another ARM Linux distro, so we encourage you to try out several distros to see which one you like the most. The OS is stored on the SD card.

Workshop Highlights

- What “the Internet of Things” means and how it relates to Cloud computing concepts
- How open platforms allow you to store your sensor data in the Cloud
- The basic usage of the RaspberryPi environment for creating your own embedded projects at low cost
- How to connect your RaspberryPi with your Android phone.
- How to send data to the Internet and talk to the Cloud.
- How to update sensor readings on Twitter (Social Networking Sites).
- Control a Relay Switch from anywhere across the world using IoT Platform from your Phone.

One day webinar on career after engineering

Date :11-12-2017

B.Tech (Bachelor of Technology) is a very popular and most preferred undergraduate degree course chosen by Science stream students after clearing their Class 12 exams. This 4-year duration course is offered by many engineering colleges across India. But once you have completed engineering, what next? This question is faced by many engineering students in the fourth year of B.Tech.

After completing the B.Tech course, candidates can either pursue higher studies (one popular exam that they can give for this is GATE) or consider pursuing a job in the field of their choice. Although M.Tech is a natural course choice after completing a B.Tech course, these days many students opt to take up an MBA course after completing their B.Tech degree program.

Other options that aspirants can consider include picking up a job at a PSU (Public Sector Undertaking), taking the Civil Services entrance exam, or joining a private company. Let's talk about each of these in detail.

TOPICS TO BE COVERED

- Introduction of the btech
- Top Career Opportunities
- B.Tech College Placements
- Higher Studies – Courses after B.Tech
- A Job in the field of your choice in the Private Sector

COURSE CONTENT:

Engineering (B.E., or B.Tech.,) is among the most popular graduation courses that students take after completing their school. Choosing the right career can be confusing for many students. The world is full of opportunities. And you might not be aware of most of them. One has to know the list of all career options after engineering to select the right one.

webinar on rentable energy system and sustainability education, research and outreach --

Date :04-12-2017

about the program

The theme of the conference is "About the Scope of Education and Research in the Field of Renewable Energy and Sustainability". This Field has an increasing Outreach in terms of Development and Innovations. This Webinar is going to help Participants to Understand and have clear Insight on this Topic, which can be Very useful in the Future.

The RES Group (Renewable Energy Systems) is a global renewable energy company which has been active in the renewable energy industry for over 30 years. Its core business is to develop, construct and operate large-scale, grid-connected renewable energy projects worldwide for commercial, industrial and utility clients. Our goal is to educate the community, both on and off campus, on what it means to be sustainable. The change we seek is a better informed community. The more we are able to educate and inspire, the greener our City of Huntington will become. We hope to help grow our college and the greater hyderabad region into a truly sustainable community, through the efforts of our education outreach program.

Topics to be covered

Community development and training
Urban and governmental affairs

in the area of Sustainable Outreach and Education are designed to foster leadership in creating a culture of sustainability on campus and within the community. This makes sustainability an integral part of the academic curriculum, research practices, and all extracurricular activities

Sheriguda (V), Ibrahimpatnam (M), Hyderabad,
R.R.Dist., Telangana – 501 510

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

Civil Engineering is a professional engineering obedience that deals with the design, construction, and maintenance of the physical and naturally built environment, including works such as residences, institutional buildings, roads, bridges, canals, dams, airports, sewerage systems, pipelines, and railways. It takes place in the public sector from municipal through to national governments, and in the private sector from individual homeowners through to international companies.

The Department of Civil Engineering was established in 2014 with an intake of 120, decreased to 60 in 2020. The departmental activities embrace Planning, Design, Construction and Management. The syllabi of the department have been tremendously augmented with many advanced courses. The department has faculty members from all specializations of Civil Engineering like Structural Engineering, Geotechnical Engineering, Environmental Engineering, Transportation Engineering and Construction Management.

ABOUT THE WEBINAR

A total station is an electronic/optical instrument used in modern surveying. It is also used by archaeologists to record excavations as well as by police, crime scene investigators, private accident Reconstructionists and insurance companies to take measurements of scenes. The total station is an electronic theodolite (transit) integrated with an electronic distance meter (EDM), plus internal data storage and/or external data collector.

TOPICS TO BE COVERED

- Different Functions
- Types of Applications
- Instrument manufacturers

COURSE CONTENT:

GPS receivers are accurate to within 3 to 15 m on avg. O GPS satellites are powered by solar energy. O Satellites are orbiting the earth about 12000 miles above from earth. O They are constantly moving, making two complete orbits less than 24 hours

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

RESOURCE PERSONS:

Dr. S. Siva Sankar, Assoc.Professor, CMRTC, Medchal

Webinar on total station and GPS

A **total station** is an electronic/optical instrument used in modern surveying. It is also used by archaeologists to record excavations as well as by police, crime scene investigators, private accident Reconstructionists and insurance companies to take measurements of scenes. The total station is an electronic theodolite (transit) integrated with an electronic distance meter (EDM), plus internal data storage and/or external data collector. The purpose of any survey is to prepare maps, control points formed a basic requirement for the preparation of these maps. There are several numbers of methods like traverse, triangulation etc., to provide these control points. Whatever the method the provision of control points, includes the measurement of two entities(Distance and Angle).Again, distance can be measured by using various instruments like **chain, tape**. Electronic Distance Measurement Instruments, Total station and GPS. Angle can be measured by using a THEODOLITE. Once distance and angular measurement is over computation is performed to provide the control points. A combination of all the three results in a powerful instrument called Total Station.

Sri Indu Institute of Engineering and Technology

Sheriguda (V), Ibrahimpatnam (M), Hyderabad,
R.R.Dist., Telangana – 501 510

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

Electronics is fundamental to many of the electrical and electronic appliances that we use today. This makes the job of an electronic engineer both exciting and challenging.

The department of Electronics and Communication Engineering was established in the year 2007 with an intake of 60 students and increased to 90 in the academic year 2008-09 and in the academic year 2010-11 the intake of students increased to 120, later the intake increased to 180 in the academic year 2012-13.

To enhance the quality of learning we move forward for more collaborations and interactions with the industry that helps our students to brace themselves for working in the industry.

ABOUT THE WORKSHOP

Cyber Security Essentials will make it possible for every small business to tap into the power of Cyber Security with apps for sales and service that are easy to use, setup and maintain. Every four months Cyber Security adds new functionality to its platform, so small theft turning into data don't have to spend additional time and resources keeping up with the latest breakthroughs in technology. They can focus on what matters most—customers.

TOPICS TO BE COVERED

A dynamic, highly professional, and a global online training course provider committed to propelling the next generation of technology learners with a whole new way of training experience

COURSE CONTENT:

Cyber security regulations improvement - The professionals who blossom with information and giving key business bits of knowledge dependent on investigating various information sources. They step up to the plate and recognize what the business ought to be following and assessing. They can thoroughly consider issues and make significant proposals. In this blog, we will discuss everything related to Cyber security Business Analyst Certification and Salary

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.

RESOURCE PERSONS:

Mr. Ragavender Rao, Associate professor, Mrec (A)

FDP on Cyber security

Cyber security is the practice of defending computers, servers, mobile devices, electronic systems, networks, and data from malicious attacks. It's also known as information technology security or electronic information security. The term applies in a variety of contexts, from business to mobile computing, and can be divided into a few common categories.

The scale of the cyber threat

The global cyber threat continues to evolve at a rapid pace, with a rising number of data breaches each year. A report by RiskBased Security revealed that a shocking 7.9 billion records have been exposed by data breaches in the first nine months of 2019 alone. This figure is more than double (112%) the number of records exposed in the same period in 2018.

Medical services, retailers and public entities experienced the most breaches, with malicious criminals responsible for most incidents. Some of these sectors are more appealing to cybercriminals because they collect financial and medical data, but all businesses that use networks can be targeted for customer data, corporate espionage, or customer attacks.

The importance of system monitoring is echoed in the "10 steps to cyber security", guidance provided by the U.K. government's National Cyber Security Centre. In Australia, The Australian Cyber Security Centre (ACSC) regularly publishes guidance on how organizations can counter the latest cyber-security threats.

Types of cyber threats

The threats countered by cyber-security are three-fold:

1. **Cybercrime** includes single actors or groups targeting systems for financial gain or to cause disruption.
2. **Cyber-attack** often involves politically motivated information gathering.
3. **Cyberterrorism** is intended to undermine electronic systems to cause panic or fear.

So, how do malicious actors gain control of computer systems? Here are some common methods used to threaten cyber-security:

ABOUT THE INSTITUTION:

Sri Indu Institute of Engineering and Technology was established by Global Trendset Educational Society - 2006, Vanastalipuram, Hyderabad under the chairmanship of Sri. R. Venkat Rao. Under the same management, Sri Indu College of Engineering and Technology is also in the field of education by New Loyola model education society - 1979. The society is having proven rich experience in the field of education for more than 41 years with an intension and commitment to impart school education and Technical education of highest quality. The college offers B.Tech programmes in Civil, CSE, ECE and Mechanical. This institute got JNTUH affiliated in 2007, The institute has high quality infrastructure and well developed laboratories in all the departments.

ABOUT THE DEPARTMENT:

Civil Engineering is a professional engineering obedience that deals with the design, construction, and maintenance of the physical and naturally built environment, including works such as residences, institutional buildings, roads, bridges, canals, dams, airports, sewerage systems, pipelines, and railways. It takes place in the public sector from municipal through to national governments, and in the private sector from individual homeowners through to international companies.

The Department of Civil Engineering was established in 2014 with an intake of 120, decreased to 60 in 2020. The departmental activities embrace Planning, Design, Construction and Management. The syllabi of the department have been tremendously augmented with many advanced courses. The department has faculty members from all specializations of Civil Engineering like Structural Engineering, Geotechnical Engineering, Environmental Engineering, Transportation Engineering and Construction Management.

ABOUT THE FDP

AutoCAD is a computer-aided drafting software program used to create blueprints for buildings, bridges, and computer chips, among other things.

Generate design ideas in any form, turn 2D designs into digital 3D objects and create fully dimension-ed drawings to document your designs.

This workshop focuses from Basics concepts in the field of designing and increases the imagination power of the students 2-D designing is the 1st design after making the 2-D view of any element it is necessary to provide the accurate dimension to our parts and finally we make the 3-D view of our element. It is necessary to the students to 1st the 2-D design. It covers introduction of designing, 2-D design, drafting and dimensioning, presenting design sheet and in the final work on some project.

TOPICS TO BE COVERED

Introduction to AutoCAD 2D Taking the AutoCAD Tour

- Navigating the Working Environment
- Working with Files
- Displaying Objects

ELIGIBILITY

Faculty members of UGC/AICTE recognized Universities and Engineering colleges all over India, however priority will be given to the faculty members.
