7.1.7: The Institution has disabled-friendly, barrier free environment

Details of the software providing the assistance for persons with disabilities.

The Institute does not have any student so far who are differently abled (Divyangjan). So right now, the institution has downloaded the “Free, Open-Source” Software providing the assistance for the persons with disabilities.

Hence, the bills cannot be procured.

If any student (Divyangjan) is going to get admitted in the future, then our management is ready to provide all the facilities.

Sound Amplifier Details

About this app

Filter, augment and amplify the sound around you and on your device.

Sound Amplifier enhances audio from your Android device, using headphones to improve listening clarity. Use Sound Amplifier to filter, augment and amplify sounds around you and on your device. Sound Amplifier increases important sounds, like conversations, without over-boosting distracting noises. With two simple sliders, you can quickly customise sound enhancement and reduce background noise.

Available for devices with Android 6.0 and later. To start using Sound Amplifier, connect your headphones (wired or Bluetooth) then go to Settings > Accessibility > Sound Amplifier.

Features

- Boost important sound and reduce unwanted or distracting noise around you and on your device.
- Listen to conversations, or use Bluetooth headphones to help you hear things like TVs or

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

This software is copyrighted by the above entities and other parties. The following terms apply to all files associated with the software unless explicitly disclaimed in individual files.

The authors hereby grant permission to use, copy, modify, distribute, and license this software and its documentation for any purpose, provided that existing copyright notices are retained in all copies and that this notice is included verbatim in any distributions. No written agreement, license, or royalty fee is required for any of the authorized uses. Modifications to this software may be copyrighted by their authors and need not follow the licensing terms described here, provided that the new terms are clearly indicated on the first page of each file where they apply.

IN NO EVENT SHALL THE AUTHORS OR DISTRIBUTORS BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE, ITS DOCUMENTATION, OR ANY DERIVATIVES THEREOF, EVEN IF THE AUTHORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE AUTHORS AND DISTRIBUTORS SPECIFICALLY DISCLAIM ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. THIS SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, AND THE AUTHORS AND DISTRIBUTORS HAVE NO OBLIGATION TO PROVIDE MAINTENANCE, SUPPORT, UPDATES, ENHANCEMENTS, OR MODIFICATIONS.

GOVERNMENT USE: If you are acquiring this software on behalf of the U.S. government, the Government shall have only "Restricted Rights" in the software and related documentation as defined in the Federal Acquisition Regulations (FARs) in Clause 52.227.19 (c) (2). If you are acquiring the software on behalf of the Department of Defense, the software shall be classified as "Commercial Computer Software" and the Government shall have only "Restricted Rights" as defined in Clause 252.227-7013 (c) (1) of DFARs. Notwithstanding the foregoing, the authors grant the U.S. Government and others acting in its behalf permission to use and distribute the software in accordance with the terms specified in this license.

Parts of this software are based on the Tcl/Tk software copyrighted by the Regents of the University of California, Sun Microsystems, Inc., and other parties. The original license terms of the Tcl/Tk software distribution is included in the file docs/license.tcltk.

Parts of this software are based on the HTML Library software copyrighted by Sun Microsystems, Inc. The original license terms of the HTML Library software distribution is included in the file docs/license.html_lib.

WXWINDOWS LIBRARY LICENCE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public Licence as published by the Free Software Foundation; either version 2 of the Licence, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public Licence for more details.

You should have received a copy of the GNU Library General Public Licence along with this software, usually in a file named COPYING.LIB. If not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA.

EXCEPTION NOTICE

1. As a special exception, the copyright holders of this library give permission for additional uses of the text contained in this release of the library as licenced under the wxWindows Library Licence, applying either version 3.1 of the Licence, or (at your option) any later version of the Licence as published by the copyright holders of version 3.1 of the Licence document.
2. The exception is that you may use, copy, link, modify and distribute under your own terms, binary object code versions of works based on the Library.
3. If you copy code from files distributed under the terms of the GNU General Public Licence or the GNU Library General Public Licence into a copy of this library, as this licence permits, the exception does not apply to the code that you add in this way. To avoid misleading anyone as to the status of such modified files, you must delete this exception notice from such code and/or adjust the licensing conditions notice accordingly.
4. If you write modifications of your own for this library, it is your

choice whether to permit this exception to apply to your modifications.
If you do not wish that, you must delete the exception notice from such
code and/or adjust the licensing conditions notice accordingly.

New!

BrailleBlaster

American Printing House
for the Blind, Inc.

Blasting Braille into the Future!

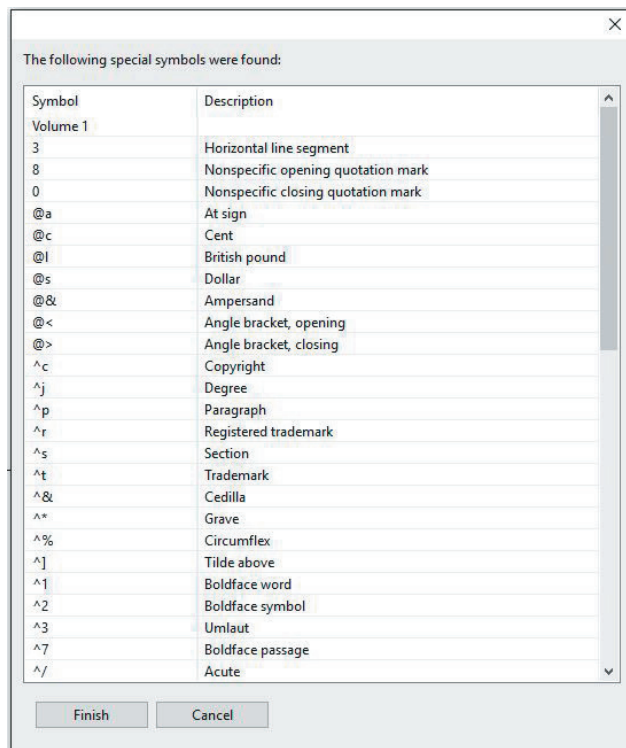

BrailleBlaster software is a revolutionary new tool for braille transcribers and others who need to produce high-quality braille material! It takes advantage of the rich markup contained in NIMAS (National Instructional Materials Accessibility Standard) and EPUB files to automate basic translation and formatting, and to make advanced tasks quicker and easier. Designed primarily for editing braille textbooks that meet the specifications published by the Braille Authority of North America (BANA), the purpose of BrailleBlaster is to help braille producers ensure that students have the necessary textbooks on the first day of class.

BrailleBlaster relies on Liblouis (liblouis.org/), an open-source braille translator, for translating text and mathematics to braille. BrailleBlaster provides all the tools necessary for a trained transcriber to efficiently produce a quality embossed braille textbook from an original publisher file, using the raw translation from Liblouis. *Using BrailleBlaster, testers have seen a substantial increase in the number of pages that a transcriber can produce compared to current methods.*

BrailleBlaster offers braille transcribers a rapid means to:

- Translate braille accurately in UEB or EBAE
- Format braille
- Automate line-numbered poetry and prose
- Split books into volumes
- Add transcriber notes
- Describe images
- Automate braille tables of contents, glossaries, preliminary pages, and special symbols pages
- Automate a variety of tables
- Do much more!

One of many features of BrailleBlaster is the Special Symbols Finder, which scans the entire transcription, identifies all special symbols, and inserts them appropriately into each volume.

continued...

BrailleBlaster, cont.

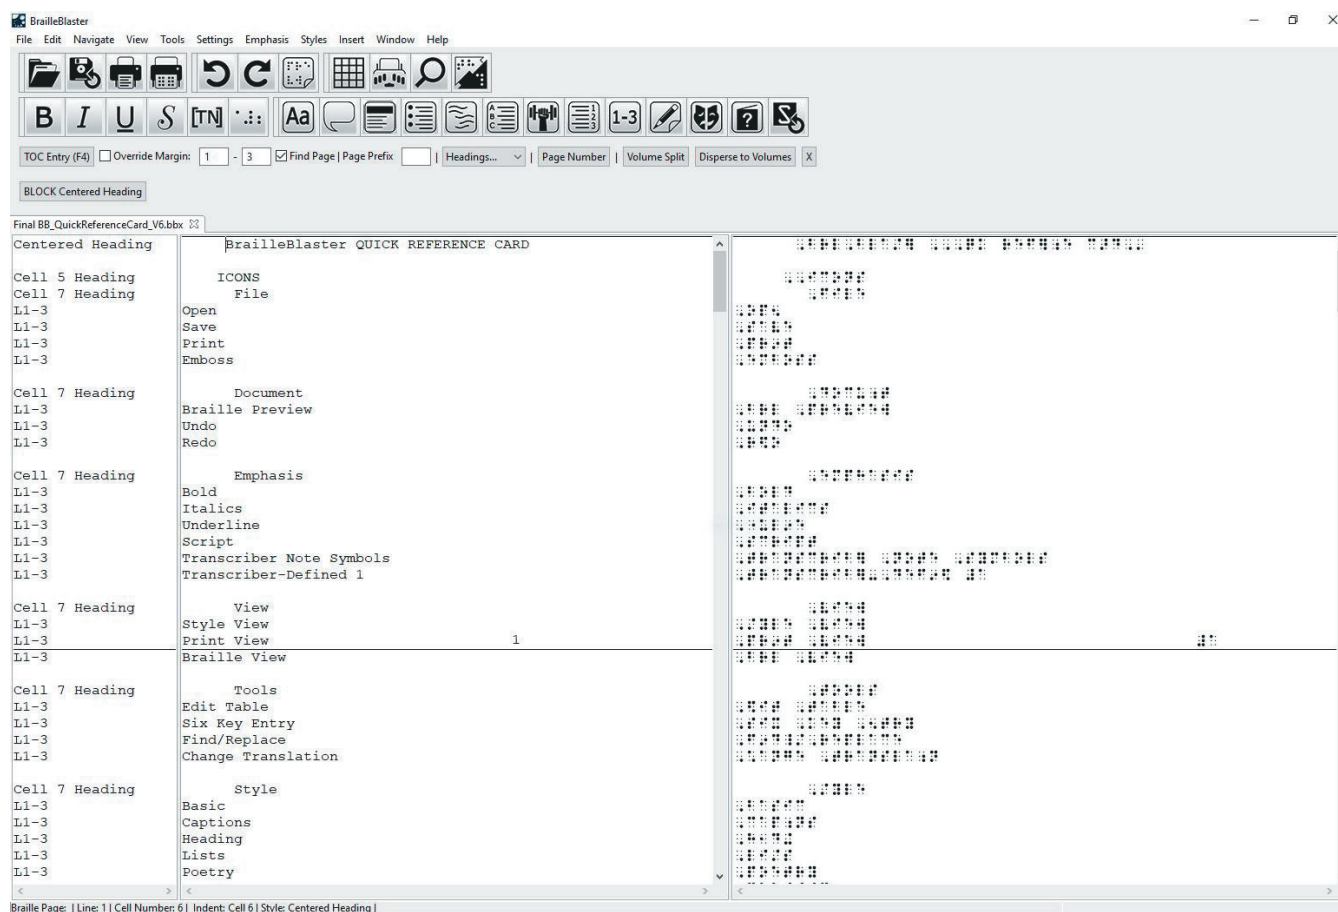

Other BrailleBlaster features include:

- Style, Print, and Braille Views that allow the transcriber to see the print text and braille text simultaneously, and to apply styles, all at the click of a key.
- Windows® and Mac® versions.

The development of BrailleBlaster and modifications to Liblouis are part of the REAL (Resources with Enhanced Accessibility for Learning) Plan. The REAL Plan is an ongoing initiative of the American Printing House for the Blind to improve the conversion and delivery of braille and other accessible formats to students who are blind and visually impaired.

NEW! Beta testing of BrailleBlaster software now expanded to teachers, transcribers, students, and parents across the United States!

For more information, visit www.brailleblaster.org

BrailleBlaster screen with Style, Print, and Braille Views simultaneously visible.
