Ethical Hacking on 18/11/2019 to 22/11/2019

Number of Students Benefited: 435

Trainer: Mr. A. Vijay Kumar

Venue: Auditorium

Mr. A. Vijay Kumar, Key Groups IT Solutions Hyderabad conducted a training session on Ethical Hacking for II,III,IV Year CSE,ECE branches. He gave a brief introduction of Ethical hacking involves an authorized attempt to gain unauthorized access to a computer system, application, or data. Carrying out an ethical hack involves duplicating strategies and actions of malicious attackers. This practice helps to identify security vulnerabilities which can then be resolved before a malicious attacker has the opportunity to exploit them.

Also known as "white hats," ethical hackers are security experts that perform these assessments. The proactive work they do helps to improve an organization's security posture. With prior approval from the organization or owner of the IT asset, the mission of ethical hacking is opposite from malicious hacking.

Stay legal. Obtain proper approval before accessing and performing a security assessment.

Define the scope. Determine the scope of the assessment so that the ethical hacker's work remains legal and within the organization's approved boundaries.

Report vulnerabilities. Notify the organization of all vulnerabilities discovered during the assessment. Provide remediation advice for resolving these vulnerabilities.

Respect data sensitivity. Depending on the data sensitivity, ethical hackers may have to agree to a non-disclosure agreement, in addition to other terms and conditions required by the assessed organization.

Training Outcomes:

- Upon completion of the course students should be able to: Plan a vulnerability assessment and penetration test for a network.
- Execute a penetration test using standard hacking tools in an ethical manner.
- Identify legal and ethical issues related to vulnerability and penetration testing.

ICT/COMPUTING SKILLS

AWS(Amazon Web Services) on 21/01/2020 to31/01/2020

Number of Students Benefited: 143

Trainer: Mr. Ravi Varma

Venue: Auditorium

Mr. Ravi Varma, Omni Tech Masters Solutions in Hyderabad has conducted training on AWS for III, IV Year CSE branch. He have been given a brief introduction.

Amazon Web Services (AWS) is a Subsidiary of Amazon providing on-demand cloud computing platforms and APIs to individuals, companies, and governments, on a metered pay-as-you-go basis. These cloud computing web services provide a variety of basic abstract technical infrastructure and distributed computing building blocks and tools. One of these services is Amazon Elastic Compute Cloud (EC2), which allows users to have at their disposal a virtual cluster of computers, available all the time, through the Internet. AWS's version of virtual computers emulates most of the attributes of a real computer, including hardware central processing units (CPUs) and graphics processing units (GPUs) for processing; local/RAM memory; hard-disk/SSD storage; a choice of operating systems; networking; and pre-loaded application software such as web servers, databases, and customer relationship management (CRM).

Training Outcomes:

- Gain industry recognition
- Validate your technical expertise
- AWS Cloud Concepts Essentials
- AWS Core Services Essentials
- AWS Security Essentials

STAAD PRO 20/08/2018 to 24/08/2018

Number of Students Benefited: 131

Trainer: Mr. K. Santosh Reddy

Venue: Auditorium

Mr. K. Santosh Reddy, CAA Pro Technologies, Hyderabad conducted training session on basics of STAAD Pro for III/IV Year CIVIL branch. He gave a brief introduction of (STAAD.Pro) is a structural analysis and design software application originally developed by Research Engineers International in 1997. In late 2005, Research Engineers International was bought by Bentley Systems.

STAAD.Pro is one of the most widely used structural analysis and design software products worldwide. It supports over 90 international steel, concrete, timber & aluminium design codes.

It can make use of various forms of analysis from the traditional static analysis to more recent analysis methods like p-delta analysis, geometric non-linear analysis, Pushover analysis (Static-Non Linear Analysis) or a buckling analysis. It can also make use of various forms of dynamic analysis methods from time history analysis to response spectrum analysis. The response spectrum analysis feature is supported for both user defined spectra as well as a number of international code specified spectra.

Additionally, STAAD.Pro is interoperable with applications such as RAM Connection, AutoPIPE, SACS and many more engineering design and analysis applications to further improve collaboration between the different disciplines involved in a project. STAAD can be used for analysis and design of all types of structural projects from plants, buildings, and bridges to towers, tunnels, metro stations, water/wastewater treatment plants and more.

Training Outcomes:

- Student will be able for carrying out flexible zooms and multiple views.
- Student will know to make isometric & perspective views and 3D shapes.
- Student will know the use of simple command language and built-in command file editor.
- Student will learn how to generate graphics/text input.
- Student will be able to do efficient algorithm that will minimize disk space requirements.
- Student will learn to take presentation quality printer plots of geometry and results as part of the run output.

Mr. K. Nageshwara Rao, EMAX Technologies in Hyderabad has conducted training on basics of ETAB'S for III/IV Year CIVIL branch. He have given a brief Introduction on E-Tabs is a software company with headquarters in London, England. The company develops and delivers data visualization and report automation software and services tailored for the market research industry. Following a management buyout in 1999 ISPC was rebranded as E-Tabs.

Training Outcomes:

CADD Center will help you to ace the associated features of ETABS:

- **Modeling:** How to create models in less time and interpret the results while working with the physical member based objects.
- **Concrete Frame Design & Detailing:** Applicable to line objects and the program determines the appropriate design procedure when the analysis is run.
- **Steel Frame Design & Detailing:** How to detail steel member selection, drift optimization and stress checking processes using various design code algorithms.
- **Steel Connection Design:** Design of steel connections is seamlessly integrated into the program.
- **Composite Beam:** To composite beams for determining their sizes for analysis, auto select-section property can be defined.
- **Dynamic Analysis:** Various options from response spectrum analysis to large deformation nonlinear time analysis.

CLOUD COMPUTING 10/08/2018 to 14/08/2018

Number of Students Benefited: 129

Trainer: Mr. K. Naveen Kumar

Venue: Auditorium

Mr. K. Naveen Kumar , Khyaathi Cloud Technologies in Hyderabad. He Have been conducted training on basics Cloud Computing of for III,IV Year CSE branch, He have given a brief Introduction

Cloud computing is the on-demand availability of computer system resources, especially data storage (cloud storage) and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Large clouds, predominant today, often have functions distributed over multiple locations from central servers. If the connection to the user is relatively close, it may be designated an edge server.

Clouds may be limited to a single organization (enterprise clouds), or be available to multiple organizations (public cloud).

Cloud computing relies on sharing of resources to achieve coherence and economies of scale.

Advocates of public and hybrid clouds note that cloud computing allows companies to avoid or minimize up-front IT infrastructure costs. Proponents also claim that cloud computing allows enterprises to get their applications up and running faster, with improved manageability and less maintenance, and that it enables IT teams to more rapidly adjust resources to meet fluctuating and unpredictable demand, providing the **burst computing** capability: high computing power at certain periods of peak demand.

Cloud providers typically use a "pay-as-you-go" model, which can lead to unexpected operating expenses if administrators are not familiarized with cloud-pricing models.

Training Outcomes:

- Understand the concepts, characteristics, delivery models and benefits of Cloud Computing
- Understand the key security and compliance challenges of cloud Computing
- Understand the key technical and Organization Challenges
- Understand the different characteristics of public, private and hybrid Cloud deployment Models.

Hadoop Technology on 21/11/2016 to 24/11/2016

Number of Students Benefited: 107

Trainer: Mr. S. Vamshi Krishna

Venue: Lab II

Mr. S. Vamshi Krishna, Kelly Technologies conducted training session on basics Hadoop Technology for branches of CSE III, IV Year students. He has given a brief introduction on Hadoop Technology.

Training Outcomes:

- Ability to store and process huge amounts of any kind of data, quickly. With data volumes and varieties constantly increasing, especially from social media.
- Fault tolerance. Data and application processing are protected against hardware failure. If a node goes down, jobs are automatically redirected to other nodes to make sure the distributed computing does not fail. Multiple copies of all data are stored automatically.
- Flexibility. Unlike traditional relational databases, you don't have to preprocess data before storing it. You can store as much data as you want and decide how to use it later. That includes unstructured data like text, images and videos.
- Low cost. The open-source framework is free and uses commodity hardware to store large quantities of data.
- Scalability. You can easily grow your system to handle more data simply by adding nodes. Little administration is required.

Trainer: K. Ravi Kumar

Venue: ECE Seminar Hall

K. Ravi Kumar, from Viven Embedded Training Academy in Hyderabad conducted a training session on **Embedding Systems** for III , IV Year ECE Students. He explained that **embedded system** is a computer system a combination of a computer processor, computer memory, and input/output peripheral devices that has a dedicated function within a larger mechanical or electrical system. It is *embedded* as part of a complete device often including electrical or electronic hardware and mechanical parts. Because an embedded system typically controls physical operations of the machine that it is embedded within, it often has real-time computing constraints. Embedded systems control many devices in common use today. In 2009 it was estimated that ninety-eight percent of all microprocessors manufactured were used in embedded systems.

Training Outcomes:

- Understand hardware and software design requirements of embedded systems.
- Analyze the embedded systems' specification and develop software programs.
- Evaluate the requirements of programming Embedded Systems, related software architectures and tool chain for Embedded Systems.
