SUMMARY REPORT for A.Y-2021-2022

S.No	Name of the course	Duration	Number of students registered	Number of students registered
1.	VLSI & CMOS Chip design and trends in embedded systems	36Hrs	115	115

Outcome:

➢ VLSI or Very Large Scale Integration is a technology for manufacturing ICs by assembling a large number of electronic elements, including capacitors, resistors, and transistors.

➢ One needs to understand that the process of designing depicts a sequential algorithm. Designers entrusted with the task often encounter specific issues regarding logic design, functional aspects, and physical and circuit design.

➢ Simulation sessions are held to verify the finalized design. Whenever the scope for improvement is sighted, design errors are rectified by repeating the previous step(s) followed while designing the chip.

1.	Mobile application development	36Hrs	120	120

Outcome:

➤ Mobile application development is the process of creating software applications that run on a mobile device, and a typical mobile application utilizes a network connection to work with remote computing resources.

➤ With mobile education apps, any student can access any kind of information, even if it is out of their syllabus. They can even learn things from higher standards if they want to. Apart from college education, they can search for any kind of information they are interested in.

➤ The research shows that using a mobile device helps students increase their learning, with 78% saying it allows them to check grades, 69% saying it enables them to take notes in class and 64% indicating that it helps them access online textbooks.

➤ Mobile Learning is a new way to access learning content using mobiles. Mobile Learning supports continuous access to the learning process. ... Offering mobile learning material for individual consumption and facilitating interaction during lessons through surveys and tests.

1.	Auto Cadd	36Hrs	20	20

Outcome:

➤ Student's ability to hand letter will improve, ability to perform basic sketching techniques will improve, able to draw orthographic projections and sections.

➤ Ability to use architectural and engineering scales will increase, ability to produce engineered drawings will improve, ability to convert sketches to engineered drawings will increase, become familiar with office practice and standards, become familiar with Auto Cad two dimensional drawings, develop good communication skills and team work.

1.	Training C Programming	36Hrs	200	200

Outcome:

➤ It will help you understand how a computer works.

➤ Almost all other programming languages can interface with it.

➤ You'll be able to work on open-source projects.

➤ It will be easier to learn other programming languages.

➤ The structure simplifies testing.

➤ It is an efficient programming language.

➤ C is a legendary and extremely popular programming language which is still heavily used all around the world in 2020. Because C is the base language of most advanced computer languages, if you can learn and master C programming you can then learn a variety of other languages more easily.

➤ C is used in all the operating systems in your computer and your cell phone and even in programming robots. Java: Java places third on the list and for good reason — it can run on many devices. If you have an Android phone, all of your apps are running Java.

1.	Oracle Java Certification	36Hrs	90	90

Outcome:

➢ Expand your knowledge base and validate your skills to appeal to potential employers.

➢ Improve your potential earning power to command a higher salary.

➢ Learn to perform complex, hands-on activities through lab, study and practice sessions.

➢ Access a secure digital badge you can add to your social media profiles.

➢ Gain exposure to a wide variety of important features, functions and tasks to use on the job.

1.	Technical Training HTML	36Hrs	100	100

Outcome:

➢ Understand professional writing by studying management communication contexts and genres, researching contemporary business topics, analyzing quantifiable data discovered by researching, and constructing finished professional workplace documents.

➢ Recognize, explain, and use the formal elements of specific genres of organizational communication: white papers, recommendation and analytical reports, proposals, memorandums, web pages, wikis, blogs, business letters, and promotional documents.

➢ Understand the ethical, international, social, and professional constraints of audience, style, and content for writing situations a.) Among managers or co-workers and colleagues of an organization, and b.) Between organizations, or between an organization and the public.

➢ Understand the current resources (such as search engines and databases) for locating secondary information, and also understand the strategies of effective primary data gathering.

➢ Understand how to critically analyze data from research; incorporate it into assigned writing clearly, concisely, and logically; and attribute the source with proper citation.

➢ Practice the unique qualities of professional rhetoric and writing style, such as sentence conciseness, clarity, accuracy, honesty, avoiding wordiness or ambiguity, using direct order organization, readability, coherence and transitional devices.

➢ Explore different format features in both print, multimedia and html documents, and develop document design skills.

➢ Revise and edit effectively in all assignments, including informal media (such as email messages to the instructor).

➢ Develop professional work habits, including those necessary for effective collaboration and cooperation with other students, instructors and Service Learning contact representatives.

Outcome:

➢ Become an Industry-ready Hands-on Embedded Engineer, after completing all related embedded assignments & projects assigned.

➢ Get certified with most advanced Embedded Systems course in India.

➢ Learn Embedded C
➢ Learn how to program, use and interact with Arduino
➢ Learn how to program, use and interact with PIC Microcontroller
➢ Learn Communication Protocols
➢ Learn Circuit Design and Simulation from scratch
➢ Learn 3D Design and Simulation to make your own 3D Models
➢ Learn PCB Fabrication from scratch
➢ Learn everything about Embedded System
➢ Learn to use all the software tools needed to be successful as an Embedded System Engineer
➢ Build an Arduino prototype to create your own game using LEDs

1.	Android application development	36Hrs	150	150

Outcome:

➢ Install and configure Android application development tools.

➢ Design and develop user Interfaces for the Android platform.

➢ Save state information across important operating system events.

➢ Apply Java programming concepts to Android application development.

➢ Basic Android Development tools such as Eclipse, DDMS, Listeners, and so on.

➢ How to use various Layouts and Widgets in Android Applications.

➢ How to create interactive applications in android with multiple activities including audio, video and notifications.

➢ How to create applications using SQLite database.

➢ How to publish your App on Google Play.

➢ Use development tools, such as those found in the Android Developer's Toolkit to efficiently create, understand, debug and optimize Android applications.

➢ Understand the key forces and constraints acting on handheld devices and know how to accommodate these when designing and building their own Android applications.

➢ Know where to find additional sources of information to understand and solve Android-related problems.

➢ Understand the Android platform's organization, patterns and programming mechanisms and be able to use them effectively to develop their own Android applications.

Advance Embedded System with ARM Processor

Course content:

DAY	FORENOON SESSION	AFTERNOON SESSION
1	Elucidate the basics of embedded system	Develop background for embedded systems
2	Knowledge of designing, testing and running embedded system	Understand about the concepts, architecture, and instruction set of ARM7
3	Provide an overview of the difference between microprocessor and microcontroller	Work on ARM processor programming including the debugging techniques (JTAG).
4	Implement external interfaces in various embedded system projects by using various interfacing techniques.	Understand timer C programming and serial communication
5	Interfacing with DC & Servo motor with different control techniques.	Understanding of the concepts of Arduino, Introduction to Processing.
6	Advantages and Disadvantages of ARM processor, Difference between Hardware and Software	Logical and Physical Address in Operating System, Memory Hierarchy Design and its Characteristics
