Abstract:

Smart home control of our home appliances using telegram bot. As technology arises, we are going into smarter world and daily new technologies are invented Smart hor automation can be done through so many ways like webservers and websites but now we are trying it using telegram application which is available in windows and androi mobile phones. Here we use both manual and automated controls for our home appliances to control anywhere form world. We perform the home automation in raspbe version 3 board. This decreases manpower and helps people saving electricity.

Complete Specification

Need for the Invention

5 The proposed method offers two significant improvements:

a.   It can improve energy efficiency

b.   Home security with greater control and flexibility. Summary of the invention

As technology arises, we are going into smarter world and daily new 10 technologies are invented Smart home automation can be done
through so many ways like webservers and websites but now we are trying it using telegram application which is available in windows and android mobile phones. In thi
project, we are going to use both manual and automated controls for our home appliances to control anywhere form world. We will install a package in raspberry pi
through that we can run our home appliances anywhere form world. This can be done using raspberry pi, we can also use other microcontrollers, but we are performing
the home automation in raspberry pi version 3.
